

STAR6 PICKING

New vertical mast **with a picking platform**

Placing the customer proximity and innovation at the core of the company's mission, enable, the world's number 3 manufacturer of aerial work platforms, to develop new technologies for a reliable and safe product range

Designed to meet the customers' requirements working at heights of 6m, the **STAR6 PICKING** vertical mast is particularly suited for

- Operations in locations where no fumes and low noise are important,
- Commercial and retail stores (DIY, cash & carry...shops),
- Warehouses (logistics, industrial...).

This new vertical mast is based on the current Star 6 offering new advantages with a platform for "**picking**" purposes.

➤ **Robust and reliable design (steel)**

The **STAR6 PICKING** allows the operator to drop and pick up parcels, small boxes, parts stored at height on shelves... with maximum comfort and safety:

- Picking tray with an edge (max. load 90 kg)
- Skirt on the platform for maximum safety (tools won't fall)
- Adjustable-height tray with 4 positions
- Ergonomic control box with a new joystick
- Saloon-style doors for an easier access to the platform.

➤ **Very compact**

With only a 1.64m height in stowed position allowing passage under standard doors and/or lifts as well as 0.76m width, the **STAR6 PICKING** is suited for working in the most congested areas.

➤ **Manoeuvrability**

Thanks to hydraulic proportional controls, all the movements are precise and totally under the operator's control. The tight turning radius allows maximum manoeuvrability and easier access to the most difficult working areas.

➤ **Excellent autonomy**

Thanks to its electric drive, the **STAR6 PICKING** features the latest technological advances and have long working cycles.

Offering maximum safety, the **STAR6 PICKING** complies with the latest labour regulations, to European (EC marking, EN 280) and also international standards (ANSI, CSA, AS ...).
